

## GUIDE FOR A SUCCESSFUL QUOTE

Files must be send necessarily in outlines or/and vectors.

Avoid splicing strokes and try to make lines as thin as possible.

Your blueprints must be in real scale, that is 1:1 proportion, being the measurements of the design in the file the same as that ones of the final piece. In case the scale is different, let us know!

Once we receive your files, we will calculate the time and complexity for your design to be done for finally give you a quote.

Your files must be in any of these formats: .dwg  
.dxf .cad

Before sending your quote request to [ventas@theatechsolution.com](mailto:ventas@theatechsolution.com), remember that it is very important to specify:

- Material to be handled
- Material's thickness
- The required service (laser cut, water jet cut, etc.)

Following these indications we can guarantee a prompt response (1 business day approx.) and a precise cost for the service you wish to hire.
